

# THE DEPARTMENT OF HEALTH & HUMAN SERVICES LOSES AND YOU WIN

*Lawsuit blows the doors off the Vaccine Scam*

**I**t isn't what you *expect* but what you *inspect*. And the Department of Human Health and Services (HHS), which was charged with critical vaccine-safety obligations as part of the "deal" for passage of the National Childhood Vaccine Injury Act of 1986, has been recently exposed as negligent for literally decades, resulting in the injury and death of scores of innocent children. Blind trust, gross negligence, probably even criminal neglect, plus lack of Congressional oversight, have led to zero vaccine-safety studies having been conducted in the more than thirty years since the 1986 Act's passage

Last May 2017, Informed Consent Action Network (ICAN) Founder, Del Bigtree, Robert F. Kennedy, Jr., and others similarly concerned about vaccine safety met with the Counselor to the Secretary of Health and Human Services (HHS), and representatives of the National Institute of Health, the Center for Disease Control, and Food and the Drug Administration in a White House-arranged meeting that exposed HHS' extreme disregard for its delegated task of assuring vaccine safety in biennial reports and the resultant negligence.

Suspicions abounded that HHS was not in compliance with demands from Congress regarding the National Childhood Vaccine Injury Act of 1986. As many know, the 1986 Act granted legal immunity to pharmaceutical companies for injuries caused by their vaccines. Congress therefore charged the Secretary of HHS with the task, *with accountability by documentation in biennial vaccine safety reports*, to assure vaccine safety.

On August 25, 2017, ICAN filed a Freedom of Information Act (FOIA) request with HHS, demanding copies of the biennial reports that HHS was required to submit to Congress starting in 1988, reports that showed the improvements it made every two years to vaccine safety. Eight months of refusal by HHS to fulfill ICAN's request resulted in the FOIA lawsuit to compel compliance. Conversely, HHS spent billions of dollars promoting vaccine use all while the cautionary aspect of their task withered on the vine.

**The fact is that HHS was never in compliance. Not a single biennial report was ever filed with Congress detailing vaccine safety. HHS defied the law; and it could not have cared less.**

Where was the Congressional accountability? How did this gross oversight slide by for so many years? HHS is clearly unconcerned about the safety of the outrageous number of vaccine doses given to children by one year of age. Instead, the Department focuses on *increasing* vaccine exposure; and for the last 30 years, in dereliction of its clear duty under of the 1986 Act, it has failed to conduct the proper science required to document vaccine safety and submitted no vaccine-safety reports to Congress. Instead, the HHS' focus has been in the National Injury Vaccine Compensation Program, defending the government against valid claims that vaccines cause harm.

On July 6, 2018, U.S. District Court Judge Jesse M. Furman signed and Stipulation and Order dismissing the ICAN lawsuit after ICAN and its counsel, Robert F. Kennedy, Jr., obtained the relief sought in ICAN's lawsuit against HHS to force a substantive response to its original FOIA request. Having obtained that response only after pushing HHS' nose to the grindstone, ICAN and others may take the next steps to protecting all of us from unsafe vaccines.
