

BIA[®]

CERTIFICATION

Level 1

Summary

Course Description

Fees & Schedules

SUMMARY

The Biological Immunity Analysis (BIA®) is a comprehensive scientific modality based on mathematical principles by which we can understand how biological life develops and functions. This model explains the multi-dimensional cause and effect of degenerative disease—namely, the *depletion, distortion, disruption* and *destruction* of the ideal electro-chemical environment of the basic molecular components and subcomponents of the cells.

Multi-dimensional Integrative Healing

The BIA® is holistically comprehensive, objective method by which we can gain an unparalleled understanding of the human condition and its potential for healing the physical, mental, emotional and spiritual being.

Lab Procedures

To achieve success in nutrition it is necessary to have the ability to measure the cause and effect of applied nutrition. Dr. Carey Reams developed a simple ingenious urine/saliva analysis method that measures the cause and effect of applied nutrition and gives us the ability to detect potential health problems prior to symptoms appearing. Integrating Reams' principles with our proprietary multi-dimensional BIA® System (BIAS), you will learn how to mathematically analyze an individual's body chemistry, making it possible to detect the location and severity of the energy loss.

BIA Systems

Dr. Gary A. Martin integrated Reams' method of analysis with his proprietary BIA® System (BIAS) thereby creating an automated, pre-diagnostic report generating tool that also serves as a fully functional client record management system. BIAS® provides a platform that seamlessly integrates with the BIA® Lab providing extensive client profiles previously unavailable. Making recommendations for dietary, nutritional supplements, homeopathic remedies, raw juice therapy, and lifestyle additions or deletions has never been less complicated.

Level 1 BIA® Certification Technical Lab & BIAS® Training

BIA® Level1 Technical Lab Training presents practical instruction to successfully conduct a lab analysis using the methods taught by Dr. Carey Reams. Basic principles of the BIA® Urine/Saliva test are taught, including an introduction to the indicators and factors. Instruction includes proper lab procedures, use, care and maintenance of lab instruments, equipment and supplies, recording lab data, and maintaining compliance with lab safety standards.

Implementing the BIAS® Training with the BIA® Technical Lab Training creates an unparalleled integrative system that allows you to confidently and efficiently market and service your client base. BIAS® Training includes instruction in the application and usage of the BIA® pre-diagnostic client record management system and report generator. You will learn how to use our proprietary BIAS® Internet platform to calculate immunological and metabolic functions, biological age, energy reserves, speed of decline and biochemical zones and ratios; identify adverse relationships between the 12 energy meridians, pathological tendencies, personality traits, stress patterns and more.

Gain confidence in test data interpretation and the ability to create comprehensive, client specific nutritional wellness programs for the prevention of biochemical imbalances and correction of biological terrain; compile protocols indicating which nutritional supplements, homeopathic remedies, raw juice therapy, or dietary and lifestyle recommendations are necessary to adjust and balance the body chemistry.

Upon completion of the course, unlimited technical support is included to assist with entry of lab data, client history, questionnaire responses, symptom indicators and proper protocols to navigate various BIAS® menus BIA® Level 1 Technical Lab Certification is the only integrative platform presently available providing the knowledge and skills to properly conduct the Reams BIA® Lab, and utilize the BIAS pre-diagnostic report generating interface. (see Topics of Interest)

Note: Access to the Professional Lab Kit and the BIAS® are necessary (not included in tuition).

~~BIA® Level 1 Certification~~ ~~\$905.00~~

Includes: BIAS® Access Registration Login Password & ID, Three Introductory BIAS® Tests, Unlimited Technical Support, 1 Personal BIA® Consultation and all Course Materials *

* Course materials include Course Study Guide, instructional lab DVD, compact disk with digital forms, inserts, documents, data sheets, templates, recipes, diets, charts, printed curriculum and text books.

Topics of Interest

- ▶ You will learn how to integrate the valuable BIA[®] software and Reams Ionization Analysis Method into your practice. This is an extensive presentation of the basic principles, physical evaluation techniques and treatment protocols of the program.
- ▶ A new approach to better digestion, assimilation and utilization of nutrients based on 30+ years of urine/saliva research.
- ▶ Relationships between nutritional deficiencies and imbalances in body chemistry.
- ▶ Identify digestive and nutritional deficiencies.
- ▶ Determine if a patient's health problems are dietary or emotional.
- ▶ Learn basic techniques to pinpoint patient's dietary excesses or deficiencies.
- ▶ Discover how to pinpoint the emotional causes behind physical symptoms.
- ▶ Learn to analyze the urine/saliva as taught by Dr. Carey Reams.
- ▶ Use the Urine Refractive Index to determine what it tells you about your health.
- ▶ Learn what Urine pH and Saliva pH tell you about your health.
- ▶ Learn what Urine Conductivity is and what it tells you about your health.
- ▶ Learn what Nitrate Nitrogens are and what they tell you about your health.
- ▶ Learn what Ammonical Nitrogens are and what they tell you about your health.
- ▶ Understand the relationships between the Actual and Balanced BIA[®] numbers.
- ▶ Understand what the Metabolic Efficiency is and how it affects your health.
- ▶ Understand what the Immune Energy is and its significance to your health.
- ▶ Learn what the Biological Age is and its significance as a progressive marker.
- ▶ Learn to identify Adverse Relationships and how they may indicate whether the body chemistry profile is physical or emotional in origin.
- ▶ Learn what the Speed of Decline is and how it is calculated.
- ▶ Understand what various nutritional regimes may be used to positively alter body chemistry.
- ▶ Determine what nutritional products are appropriate for various body chemistries.

Professional Lab Kit

Item No.	Description
6869	Portable digital LED microprocessor based flat probe pH meter
6874	Special Purpose Easy Read Refractometer (range 1-10) Brix Accuracy +/- 0.2 w/pouch
1276	Auto Range EC (Electrical Conductivity) Meter (0.01 200.0 mS), ATC (Auto Temperature Compensation), LCD display, Auto shutoff, No dilution
6868	pH Buffer Calibrating 4.01 Solution (1 pint)
6867	pH Buffer Calibrating 7.01 Solution (1 pint)
6876	Nitrate Nitrogen (NO3) Reagent (30 ml) w/ glass dropper
6872	Ammonia Nitrogen (NH4) Reagent (30 ml) w/ glass dropper
6873	Universal Extracting Solution [UES] (250 ml)
6871	Glass Pipettes , Glass Tubes
6866	Ureas Color Chart
6853	Conductivity Reference Calibrating Solution 112,800
6877	Porcelain Ceramic Well Plate (12 spot positions)
6855	Urine 4 oz. Specimen Cups (5)
6864	Glass Bottle Blue w/dropper
6863	Crucibles (4)
6865	Glass Jars (4)
116	Specimen By Mail Containers (5)
6876	Purification Test Strips
6856	Saliva 1 oz. Specimen Cups (5)
	Lab Kit Portable Carrying Case, Timer, Calculator, Pen Light
5789	BIA Complete Professional Lab Kit Total <i>Approximate Weight = 11.3 lbs (5.1 kilo) (Plus actual shipping to be determined)</i>
